

Experience Energy...

Inspired by the northern lights, Aurora fuses preserved moss with integrated mood lighting to conjure the aurora borealis. The moss surface provides depth and texture, while shifting gradients of light flow across it in luminous waves. The composition is both serene and dynamic – a dialogue between biophilia and celestial glow.

Why Preserved Moss?

Preserved moss walls bring the richness of nature indoors while performing as natural acoustic absorbers. With no need for watering, light, or trimming, they deliver lasting greenery at minimal cost. Their porous texture softens sound and improves comfort, while their preserved state ensures long-term sustainability by eliminating ongoing resource use.

PRESERVED FROM NATURAL STATE

It captures the rich, lifelike texture and vibrant tones of live moss, yet it remains beautifully stable

- + Stability and Longevity
- + Natural Aesthetic
- + It retains its appearance for years if kept dry and away from direct sun.

TACTILE

Soft, velvety, and natural to the touch — inviting a sensory connection with nature indoors.

- + Authentic Texture
- + Comforting touch
- + Durable Feel

ACOUSTIC

The organic, fibrous structure of helps diffuse and absorb ambient noise.

- + Sound Absorption
- + Acoustic Comfort
- + Biophilic Acoustics

SUSTAINABLE

Aligns with Sustainable Design Frameworks

- + Resource Efficient
- + Eco-Friendly Sourcing
- + LEED and WELL Contributions

MAINTENANCE FREE

Delivering a Lush, Natural Aesthetic, eliminating operational Cost and Complexity.

- + Zero Irrigation
- + Sunlight Independent
- + Low OPEX Advantage

LEED POINTS

+4

By being Maintenance-Free, Resource-Efficient and Biophilic, supports LEED v4 credit Pathways

- + Low-emitting Materials
- + Sourcing of Raw Materials
- + IEQ (Indoor Environmental Quality)
- + SS Sustainable Sites

FIRE RESISTANCE

Added fire-resistant treatments, they complies with interior building codes, ensuring that biophilic design does not compromise safety.

- + Tested and Certified
- + Safety Integration
- + Design Confidence

EXPERIENTIAL

Attachment solution using physical hardware to attach to an existing surface or substrate.

- + Multi-Sensory Engagement
- + Emotional Resonance
- + Place-Making Power

Multiple Spatial Possibilities

Preserved moss walls bring the richness of nature indoors while performing as natural acoustic absorbers.

With no need for watering, light, or trimming, they deliver lasting greenery at minimal cost. Their porous texture softens sound and improves comfort, while their preserved state ensures long-term sustainability by eliminating ongoing resource use.

CEILING AND WALLS

As architecture specialties, moss adds texture, calm, and acoustic comfort

- + Specialty wall finishes with acoustic absorption
- + Distinctive overhead finish for spatial identity

CURVED SUBSTRATES

Flexible specialty finish that combines organic texture with spatial fluidity.

- + Flex-mounting systems for concave/convex forms
- + Creates sculptural surfaces that enhance spatial identity and user experience

COLUMN WRAP

Preserved moss column wraps turn structural elements into living-like design features

- + Seamless 360° coverage with natural texture
- + Enhances wayfinding and spatial rhythm with organic presence

LIGHTING INTEGRATION

Elevates surfaces into immersive architectural features,

- + Enhances depth, shadow, and texture
- + Compatible with LV and specialty LED systems

ACOUSTIC BUFFERS

As panels are mounted, gaps or coves are detailed to optimize noise absorption

- + Airspace behind, enhances absorption through depth and resonance.
- + Reveals between panels act as sound traps, diffusing and buffering noise

SIGNAGE

Turns branding and into living-like architectural features, combining identity with biophilic presence.

- + Cut-Out Lettering
- + Lighting & Depth Integration
- + Enhances visibility while emphasizing moss texture.

WOOD & METAL BEAVEL INTEGRATION

Bevel frames natural textures with architectural sharpness, creating refined transitions and functional edges.

- + Crisp durable edges and transitions
- + Functional Detailing

FRAMING

- + Wood framing paired with preserved moss transforms installations into architectural art pieces
- + Architectural borders
- + Durability and Craft

Preserved Moss Materiality Options and Understanding

Reindeer Moss - PMC#RD01LG

Preserved Reindeer Moss combines natural beauty, acoustic benefits, and sustainability for modern interiors. Its soft texture and vibrant colors evoke Nordic landscapes while remaining maintenance-free. Responsibly harvested and eco-preserved, it supports green-building goals and offers a timeless biophilic aesthetic without the upkeep of living walls

.....

**Preserved Reindeer Moss
Light Green**

**Preserved Reindeer Moss
Medium Green**

Preserved Moss Materiality Options

Pole Moss - PMC#PL01LG

A Preserved Pole Moss panel creates a sculptural focal point with rounded, cushion-like forms that add depth, texture, and shadow play. Beyond its bold visual impact, it enhances acoustics, making it ideal for reception areas, hospitality spaces, and branded interiors that celebrate nature's sculptural beauty

.....

Preserved Moss Materiality Options

Sheet Moss - PMC#ST01GR

A Preserved Sheet Moss panel offers a smooth, velvety surface that evokes the forest floor with subtle tonal depth. Its continuous texture creates a serene, timeless backdrop while enhancing acoustics. Ideal for minimalist feature walls or refined settings, it delivers understated elegance and biophilic presence.

.....

Preserved Moss Materiality Options

Mood Moss - PMC#LG01GR

A Preserved Mood Moss panel adds dramatic depth and softness with its rich, dimensional texture. Both visually striking and acoustically effective, it creates a bold biophilic statement – ideal for hospitality, wellness, or corporate feature walls where atmosphere and impact matter

Inspiration

Product Specifications

Product Name	Lamina
Product ID	SUR-PFL-051
Acoustics	0.70 - 0.95 NRC*
Lead Time	Lead time is dependent on project size. Contact us for more information.
Durability	Contract

CSI Creative Preserved Moss foliage goes through a conservation process in which living moss is dried and rehydrated, making sure that the mosses natural color and texture remain intact. Utilizing real moss emphasizes sustainability and biophilic design principles.

Warranty	Comes with industry-leading standard warranty.
Flammability	ASTM E84: Class A
Custom	Custom colors and manufacturing services available. Additional charges and lead times may apply.
Maintenance	Dry dust or vacuum occasionally to remove airborne dust or debris. Mild detergents or soaps may be used to remove stains. For detailed care instructions, refer to the CSI Creative Maintenance Information document.

Material Specifications

	Soundcore®
Content	Recycled PET acoustic felt
Weathering	Colorfast, non-deteriorating, non-hygroscopic
Environmental	Recycled PET acoustic felt is 60% post-consumer recycled content and is 100% recyclable. Contributes points toward LEED v4, CDPH v1.2, VOC free, non-toxic, non-allergenic, anti-microbial - does not attract mold and mildew. Compliant with Living Building Challenge criteria & DECLARE Red List Free.
Variation	PET felt panels are created through a manufacturing process known as 'felting'. This process results in a heathered appearance. Multiple color tones may appear in the same panel. Slight color variations should be expected.
	Preserved Moss®
Content	100% Natural Preserved Moss® - Reindeer & Pole Moss
Weathering	Preserved by immersion, hand-cleaned for quality assurance, requires no misting or irrigation. Avoid excessive sun, heat, & humidity.
Environmental	100% Natural Preserved. Contributes points toward LEED v4, VOC free, non-toxic, non-allergenic, anti-microbial - does not attract mold and mildew. Compliant with Living Building Challenge criteria & DECLARE Red List Free.
Variation	Preserved Moss® is applied by hand, creating natural variations in color, depth, and density that reflect its organic character.

*Approximate - NRC rating may vary based on product dimensions and spacing. A higher NRC can be achieved with an air gap.

Lighting Specs

Lighting Fixture Features:

- + ▪ Hybrid neon tape, completely dot-free
- + ▪ Field cuttable & joinable
- + ▪ Low voltage DC24V
- + ▪ 100-300 lumen outputs
- + ▪ IP65 rated, ideal for damp location and sheltered exterior
- + ▪ 5 years warranty

Mounting:

LNEOS-SC-10

Name	Straight surface channel
Material	Aluminum
Standard Length	3.28' (1M)

LINIO NEON EOS TV (IP65) Static White LED Strip:

Temp./Color	1.46W/ft	2.93W/ft	4.39W/ft
■ 2200K	85	169	250
■ 2700K	89	190	284
■ 3000K	93	194	287
■ 3500K	95	190	284
■ 4000K	98	189	296
Max. Run for Class 2 Low Voltage (ft)	16.4	16.4	16.4
Max. Run Length (ft)	16.4	16.4	16.4
Storage Temperature	-13~140°F	-13~140°F	-13~140°F
Ambient Temperature	-13~113°F	-13~113°F	-13~113°F

Technical Details

Efficacy	64.5lm/W @4000K 2.93W
CRI	Ra ≥ 90
Beam Angle	110°
LED MacAdam	3 steps
Life (L70)	> 102,000 hours
Max. Length Per Reel	98.4' (30M)
Finish	Matte

Dimensions

Standard Unit Dimensions

Typical ranges for height and width.

Custom Opportunity

Product dimensions can be manipulated in order to fit your design aesthetic and site conditions.

Material Options

The layouts shown are a summation of individual units. Individual units may be assembled in various arrangements to dictate the larger design. Configurations shown are suggested, but can be rearranged to achieve a custom layout.

Reindeer Moss
1"-1.5" Depth

Mood Moss
2"-3" Depth

Sheet Moss
1"-1.25" Depth

Pole Moss
2"-2.25" Depth

Backer Options

Soundcore®

Our recycled PET felt creates an acoustic barrier, defending against wandering white noise and irritating echoes.

Single Layer
½" Thickness

Wood treated plywood 1/2"

Ideal for recessed wall opportunities & and Pre-Manufacture Solutions

Single Layer
½" Thickness

Panel Configuration Options

The layouts shown are a summation of individual units. Individual units may be assembled in various arrangements to dictate the larger design. Configurations shown are suggested, but can be rearranged to achieve a custom layout.

Individual Panel Coverage

Upper Wall Option

Upper Wall Individual Option

Installation Options*

All products and installation methods can be **customized** to meet the unique requirements of your space.

Adhesive Direct Advantages

Attachment solution using an adhesive to apply directly to an existing surface or substrate.

- + Fastest installation time
- + No gap between target surface and product
- + Lowest profile installation option
- + Easiest to install
- + Most versatile installation option

Available methods: Construction Adhesive, Peel & Stick, Custom

Mechanical Direct Advantages

Attachment solution using physical hardware to attach to an existing surface or substrate.

- + No clamping or dry time necessary
- + Easy to remove and does not damage the substrate when removed
- + Most appropriate installation solution for heavier products
- + Provides an opportunity for an air gap, which can increase the acoustic value of a product

Available methods: Z-Clips, Panel Clips, Standoffs, Screw & Washer, Magnet, Custom

*Not all listed attachment methods may be applicable to this product.

Why Moss?

Being surrounded by moss evokes the feeling of walking through a misty Rainforest enveloped by trees. Its velvety texture blanketing the forest floor creates a comforting environment. Incorporating biophilic design by including moss into interior spaces creates a bridge between the natural and built world.
