KALEIDOSCOPE

INTRODUCTION

The CSI Creative® Kaleidoscope collection is a light installation as well as a suspended divider. It provides a level of privacy but lets loads of light pass through that when in contact with the colored panels create a beautiful projection on the rooms surfaces. This chromatic composition can be customized to fit your needs and desires.

EXPERIENCE PROJECTION

If you have ever seen light pour through stained glass windows you know how beautiful colors can be. Picture the same experience outside of its traditional location and perhaps at your office or school. Feel the nostalgia and joy that comes from primary color projection and travel back in time to your first time experiencing such a sight.

OUR MISSION

EXPERIENTIAL SPACES

Our goal is to create spaces that feel better.

It's easy to visualize a space with architectural acoustics, but even the most detailed renderings couldn't convey the experience of actually being there. When sound is properly controlled within a space, it creates focus and calmness that you can actually feel. We want to help you turn off the droning machinery in the back of your mind. We fabricate custom solutions that visually suit your space while building towards a more soothing holistic experience. This creates spaces where people want to be—where they want to work, where they want to sleep, exercise, create, study, and relax.
